

# Michael Huang

Oakland, CA | (415) 505-8933 | michael.micah.huang@gmail.com | www.linkedin.com/in/michael-micah-huang

## EDUCATION

<b>California Polytechnic State University - San Luis Obispo</b> <i>Bachelor of Science in Computer Science, Minor in Philosophy; Graduation: August 2025</i>	San Luis Obispo, CA GPA: 3.40
• <b>Relevant Coursework:</b> Data Structures & Algorithms, Computer Architecture, Operating Systems, Systems Programming, Database Systems, Deep Learning	

## PROFESSIONAL EXPERIENCE

<b>Dynamic Experts</b> <i>Contract AI Engineer</i>	December 2025 – January 2026 Remote
• Delivered a fully documented, production-ready codebase with <b>157 unit tests</b> (Vitest), ensuring seamless handoff to the client engineering team	
• Architected a production-grade MCP (Model Context Protocol) server to expose deep-research capabilities, integrating Gemini 2.5 Pro with markdown sanitization and automated citation handling	
• Optimized async polling architecture with <b>90-minute timeout handling</b> to support long-running inference tasks ( <b>60+ minutes</b> ), solving critical timeout issues in standard HTTP request flows	
<b>Solidigm (Formerly Intel NAND)</b> <i>Automation and Product Engineering Intern</i>	
• Migrated legacy Python 2.7 automation frameworks to Python 3.x, modernizing the codebase for <b>600+ production-line tests</b> and significantly reducing false-positive failures	June 2022 – August 2023 Folsom, CA
• Engineered end-to-end automation scripts that increased test coverage, saving the engineering team approximately <b>8 hours of manual verification per SKU</b> during testing cycles	
• Performed root cause analysis on non-product failures, implementing patch fixes that improved overall testing stability and reduced infrastructure downtime	

## HACKATHON

<b>SkepticScript – Claude Code Hack Day</b>   <i>Azure Speech, Gemini, TypeScript</i>	Jan 2026
• Won <b>2nd place</b> (Silver Medalist) out of <b>25 teams</b> at Claude Code Hack Day @ AWS with Jam.dev	
• Architected a real-time speech verification engine that cross-references live audio against LLM knowledge bases	
• Engineered a JSON Schema validation layer using Gemini to ensure deterministic, error-free outputs from non-deterministic LLMs, solving structural hallucination issues	
• Led orchestration of <b>four microservices</b> (Azure Speech, Gemini, Backend, Frontend) and shipped a fully integrated, crash-resistant MVP in a <b>9-hour sprint</b>	

## PROJECTS

<b>Personal Finance Dashboard (MERN)</b>   <i>MongoDB, Express, React.js, Node.js, JavaScript, TypeScript</i>	
• Built a full-stack budgeting application with real-time transaction syncing and automated expense categorization using the MERN stack	
• Implemented secure user authentication and RESTful APIs to manage user accounts and transaction data reliably	
• Designed a responsive dashboard with visual spend breakdowns and filters so users can quickly identify patterns and adjust decisions	

## Custom Linux Shell & System Programming | *C, POSIX*

- Implemented a custom Linux shell supporting pipes and process management to mirror core Unix behavior
- Built a text-based client-server messaging tool between two Linux machines using sockets
- Developed a tape archiver and Huffman encoder/decoder to explore low-level compression techniques

## TECHNICAL SKILLS

**Languages:** Python, C/C++, Java, JavaScript (ES6+), TypeScript, SQL  
**Web Development:** Node.js, Express, React.js, MongoDB, RESTful APIs  
**AI/ML:** PyTorch, Gemini API, Azure Speech SDK, Sklearn, Jupyter Notebook  
**Infrastructure:** Git, Linux, POSIX, MCP, Firecrawl API, Vitest, Confluence, Jira
